AGRICULTURAL

1. A Guide to Safe Agricultural Fuel Storage Systems (10Min)

Deals with ground water contamination from spillage, safety of Storage tanks, what to do in case of emergency fuel leaks, proper way of servicing tanks.

2. Conservation on Your Own (A “how to” video that will help you do your own soil conservation) (53Min)

How to: Measure & manage crop residues
Lay out contour lines and use field borders
Contour buffer strips (see jacket)

3. From Barnyards to Stream (16Min)

Nonpoint source water pollution/manure management and clean water

4. How to abandon an Earthen Manure Storage Facility (13Min)

5. Implementing No-Till (Midwest Edition)(19Min)

6. Manure (15Min)

How farmers handle manure and the benefits of manure management

7. Naturally Fertile Fields (15Min)

Benefits of manure use on farm fields

8. PPI Herbicides & Conservation Compliance(20Min)

Deals with management of HEL fields

9. Part 1-Soils of Wisconsin (16Min)

Part 2-Soil Surveys of Wisconsin (24Min)

Part 1-Explains soils of WI to Grade to Middle School Ag Groups

Part 2-Demo of soil testing to Middle to High School Ag Groups

10. The Soil Survey (15Min)

Helps to understand that soil surveys are a very useful inventory tool which can help solve many of today's land use problems

11. Solving The CRP Puzzle (45Min)

Explains the objective of the Conservation Reserve Program

12. Soybean Conservation Tillage 30-50% Residue Cover (15Min)

Discusses the benefits of residue left on fields

13. Stay Eligible for USDA Programs (8Min)

14. Straight Talk About Your Conservation Plan (20Min)

Ag related –Tips on solving conservation problems, groups etc.

15. Sustaining America's Agriculture (29Min)

How farmers minimize environmental impacts while maximizing production

16. Tell it Like it Is (16Min)

Farmers explaining how conservation compliance is helping them

17. The Farming Ugly solution (13Min)

No-till farming

18. Wisconsin's Sustainable Agriculture (57Min)

Rotational grazing—cows, sheep, chickens. Organic Farming

19. How to Fill and Seal a Well (20Min)

20. Shoreline Restoration—A growing Solution (10Min)

URBAN

1. Beyond Drainage: A New Approach to Stormwater Management (8Min)

Benefits of stormwater management

2. From Curb to Stream (18Min)

County and city programs on clean water projects

3. How to Fill and Seal a Well (20Min)

4. Shoreline Restoration – A Growing Solution (10Min)

WATERSHED MANAGEMENT

1. Partnership for Watersheds (13Min)

2. Voices of Experience –Watershed Protection for The Future (17Min)

RECOURCES

1. Conservation in the 90's: Meeting the Water Quality Challenge (20Min)

How county and farmers are working together to improve water quality, erosion control, nutrient management, etc.

2. Wealth in Wetlands (23Min)

Assets of wetlands in agriculture

3. Wetland Restoration & Enhancement (17Min)

4. It all Adds UP –Taking Action For Cleaner Water (15Min)

A video series about nonpoint source water pollution

MICELLANEOUS

1. No-Till Video (15Min)

Put out by manufacturer of Roundup – BMP for applying their products

2. “We Owe it to Our Children” Video (19Min)

How to market videos for public service and news media

3. Working With The Best (Best Management Practices for Water Quality)(10Min)

Put out by Dupont explaining BMP for applying their products
